

Elocks

Keeping your goods safe should be a cakewalk—only if you have elocks. Best organizations prioritize safety because they know that safety is not just a slogan on the wall but a habit. Safety is how you can minimize your losses.

Safety is elocks!

Take control of your business from the comfort of your couch

Access ripe telemetry data and monitor your fleet through a single screen. Reduce business inefficiencies, zoom into critical issues, and respond proactively.

Elocks for fleets

- 01 | Digitize the way you lock/unlock your fleets.
- 02 | Elocks will free your drivers from the hassle of managing physical keys.
- 03 | You can do all this and more while still enhancing the safety of your fleets.
- 04 | Restrict access to authorized personnel only.

Elocks for assets

- 01 | Goods need constant protection during transit, and elocks can do that.
- 02 | With elocks, you can track the precise location of your shipment.
- 03 | You can also track unauthenticated opening/closing of container doors.
- 04 | Unlock containers remotely without handing out physical keys!

Why do you need elocks?

If you are spending sleepless nights worrying about your shipment or cargo, then equipping your trailers with elocks is an ideal solution for you. Real-time elock alerts coupled with precise consignment location can help you slash down your losses. Be the first to know about any and every activity related to your shipment. You get text, call, and email notifications for:

Theft

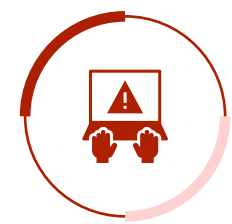

Unauthorized activity

Wrong password attempts

Consignment door opens or closes

Elock tampering

Elock live status

But that's not all!

When we say elocks are superior to traditional locks in every way—we mean it:

1. Configurable alerts

You can add a new alert or customize an existing elock alert based on your business needs. For instance, if your driver travels on a route other than the one assigned, or if your trailer is traveling at speeds greater than 80km/h—you get notified.

2. Access Analytical Reports

- a. Elock Status Report:** Here, you'll know the battery percentage of your elocks, along with their location, and lock or unlock status.
- b. Elock violation Report:** Any attempt to tamper with the elocks like entering wrong passwords or steel-pipe removal will be reflected here along with the date, time, and location of the occurrence.
- c. Lock/Unlock Report:** Review the time, location, and video playback for the unlocking and then locking of consignment or shipment doors.

🔒 Truly, your safety is in your hands!

In a nutshell, here is why you should invest in elocks:

Protect your high-value goods—even when they are on the road.

Eliminate losses because of theft or pilferage

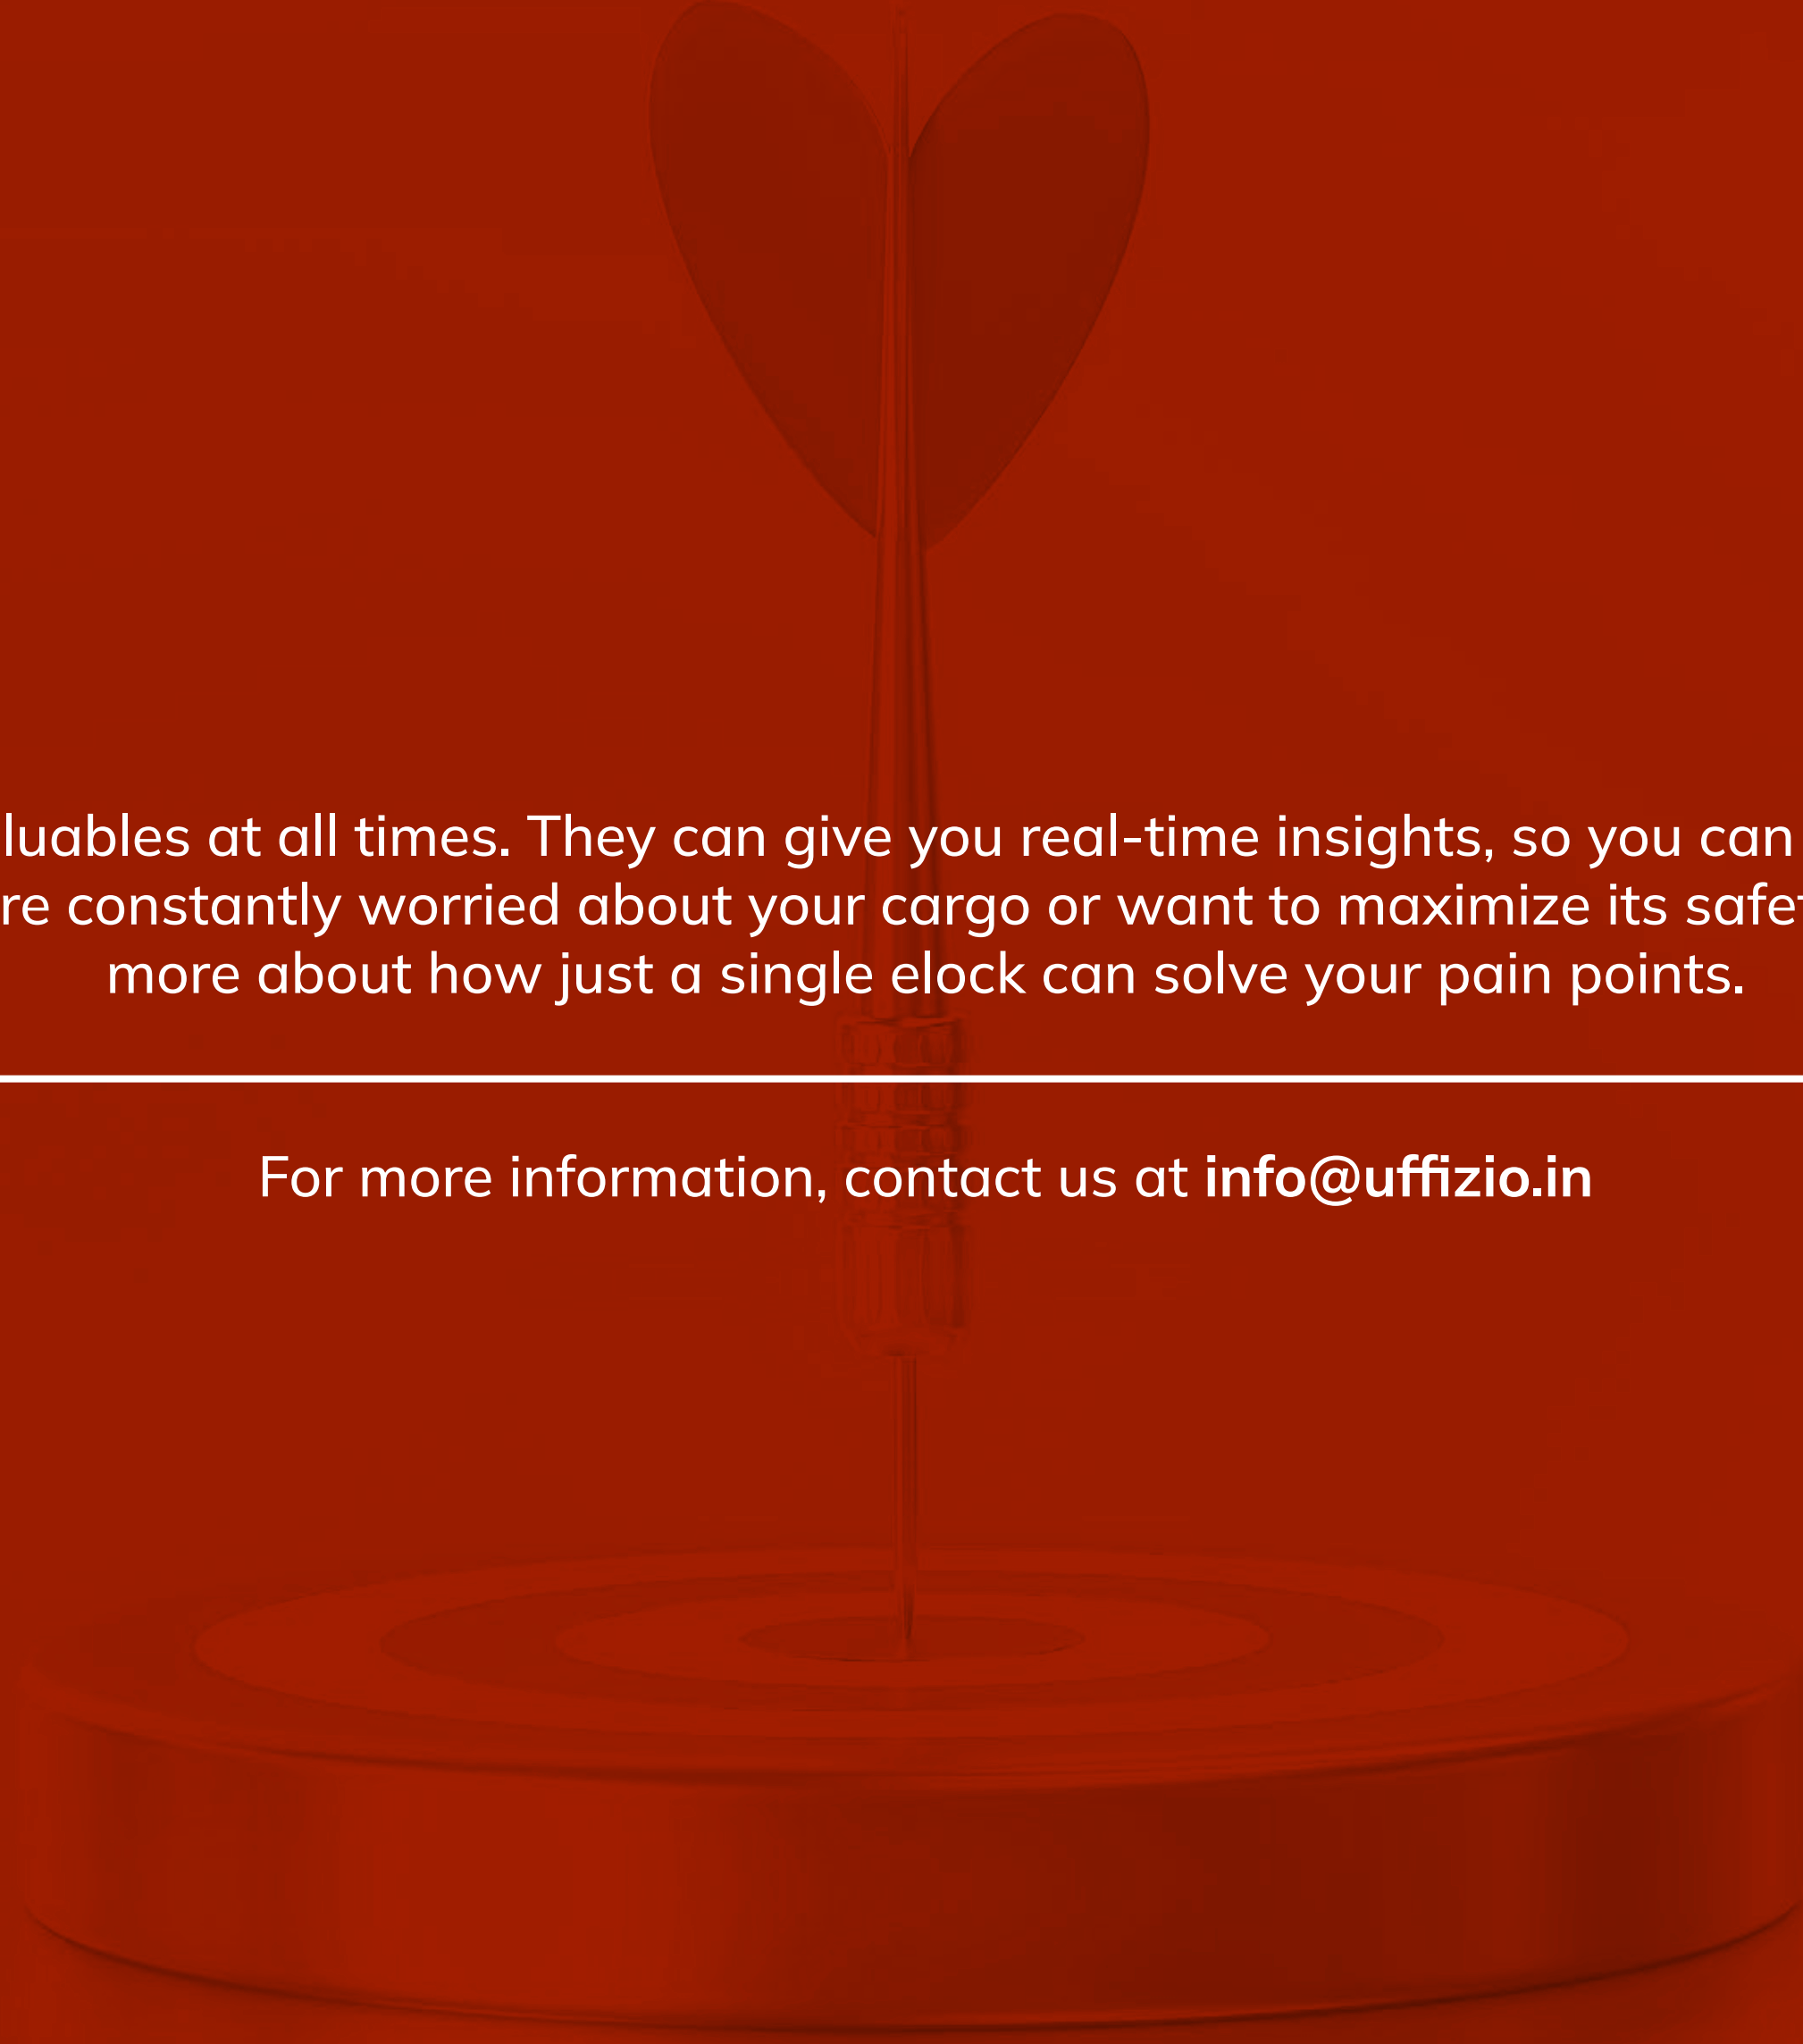

Limit access to your vehicle to authorized personnel only

Replace physical keys with digital solutions and never worry about lost or circulating keys

Elocks protect your goods and valuables at all times. They can give you real-time insights, so you can stop theft or address unauthorized actions before it's too late. If you're constantly worried about your cargo or want to maximize its safety, then contact us and we can talk more about how just a single elock can solve your pain points.
