Experience unbeatable

Transparency & Visibility

The greatest organizations in the world build trust through transparency, and so can you! Access ripe telemetry data and monitor your fleet through a single dashboard. Reduce business inefficiencies, zoom into critical issues & respond proactively.

Diligently protecting your drivers with

Driver Monitoring System (DMS)

With DMS, fleet managers will know what their drivers are doing, how well they're driving, and the level of their alertness. For instance: if your driver uses a cellphone, smokes in the car, or dozes off while driving—you get notified.

Identify distracted or drowsy drivers

Playback footage for driver training
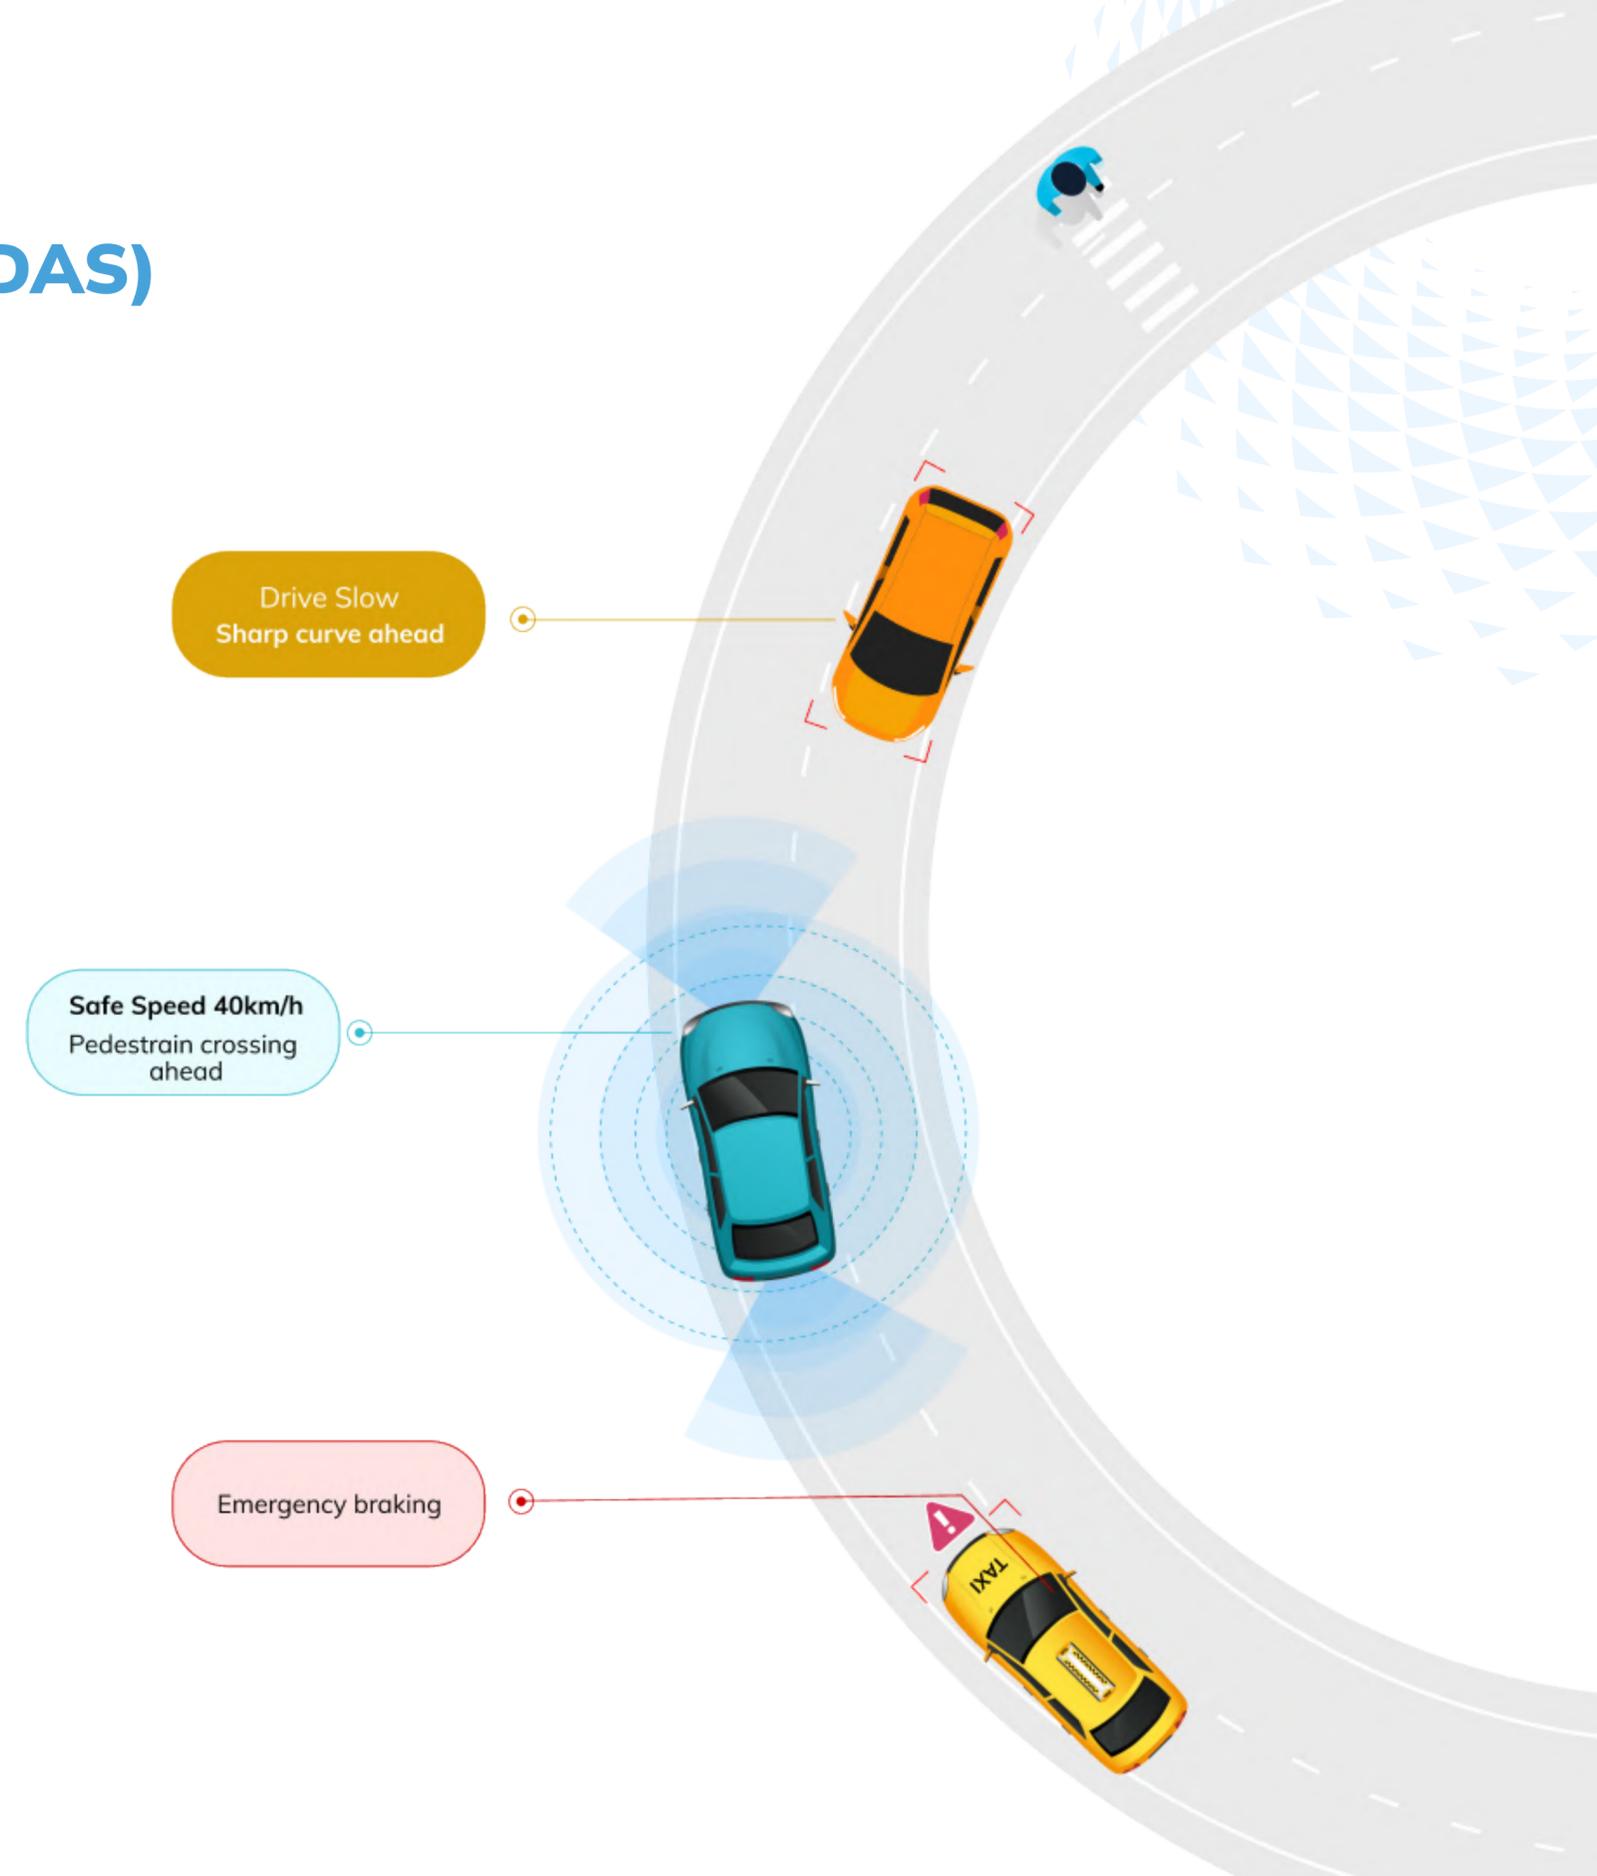

Successfully implement complaint driving behaviors

Video snapshot of driver violations

Drive into the future with

Advanced Driver Assistance Systems (ADAS)

ADAS will quickly become your driver's best friend: guiding them through lane changes, parallel parking, or rush-hour traffic. ADAS can predict a possible collision and warn drivers about it. With ADAS, your drivers will be safer than ever!

Lane departure guidance

Vehicle or pedestrian collision warning

Blindspot detection

Understanding driving patterns

Drive Slow
Sharp curve ahead

Safe Speed 40km/h
Pedestrain crossing ahead

Emergency braking

For 'hot & fresh' deliveries, choose:

Temperature Monitoring

Say your consumable goods like milk, meat are in transit. Sadly, your drivers are running late. Time is ticking. Late delivery means spoiled products & unhappy customers. What will you do? Don't worry, our temperature monitoring system has got your back!

01 | Enhance product sustenance

02 | Alerts for changes in storage room temperature

03 | Change temperature when needed in a single click

04 | Reduce losses because of product spoilage

Temperature
-8°C

Temperature Summary

Port ▲	Distance	Start Location	Average Temperature	Min Temperature	Max Temperature	End Location
AI2	18.44	At CanIQ parking place	40.00	40.00	40.00	At Office Building
Analog input 1	0.00	--	0.00	0.00	0.00	--
Remaining Fuel	0.00	--	0.00	0.00	0.00	--

Tracking and beyond:

The Live-tracking Screen

Roads are unpredictable and you need more than simple tracking to run your business. You'll need a live-tracking screen that tells you everything about your vehicles and drivers. Good for you, we've got just that:

Insights into fleets' travel hours, engine health, or mileage

Playback delivery routes and access historical data points

Recover stolen or misplaced fleets with ease

Increase business productivity by checking up on tasks & drivers

Transparency and Visibility
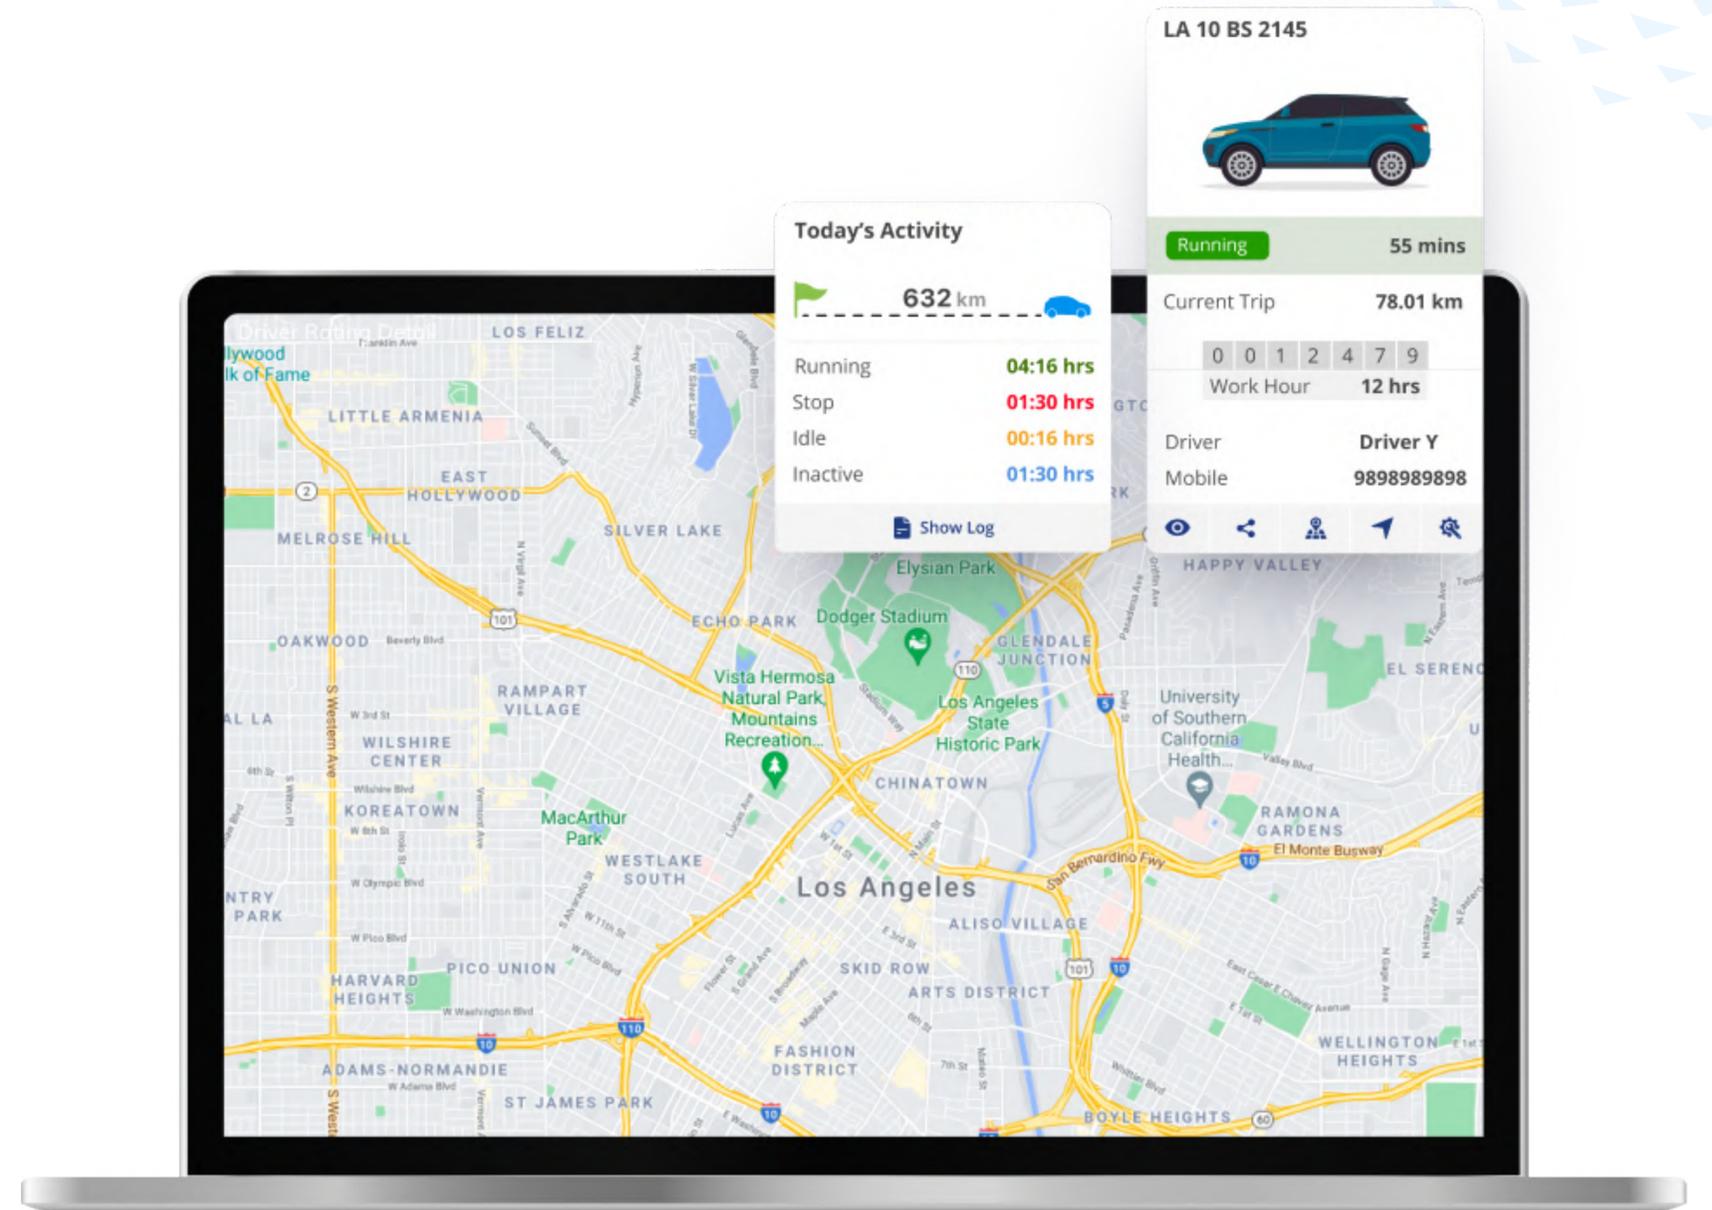

Don't let your engine remain a mystery!

OBD Parameters

OBD refers to a vehicle's fault-finding device, which indicates when trouble arises with your fleet's internal systems. It is great for monitoring engine health and helps you react to critical issues quickly.

Identify engine problems in no time

Real-time alerts empower you to make smarter decisions

Useful Diagnostic Trouble Codes (DTCs)

Reduce downtime and optimize vehicle performance

Poor driving may cost you more than you think

Driver Performance

Your vehicles are at the mercy of your drivers. Good drivers establish a strong fuel economy and reduce corrective maintenance costs. Monitor driver performance and identify problematic drivers:
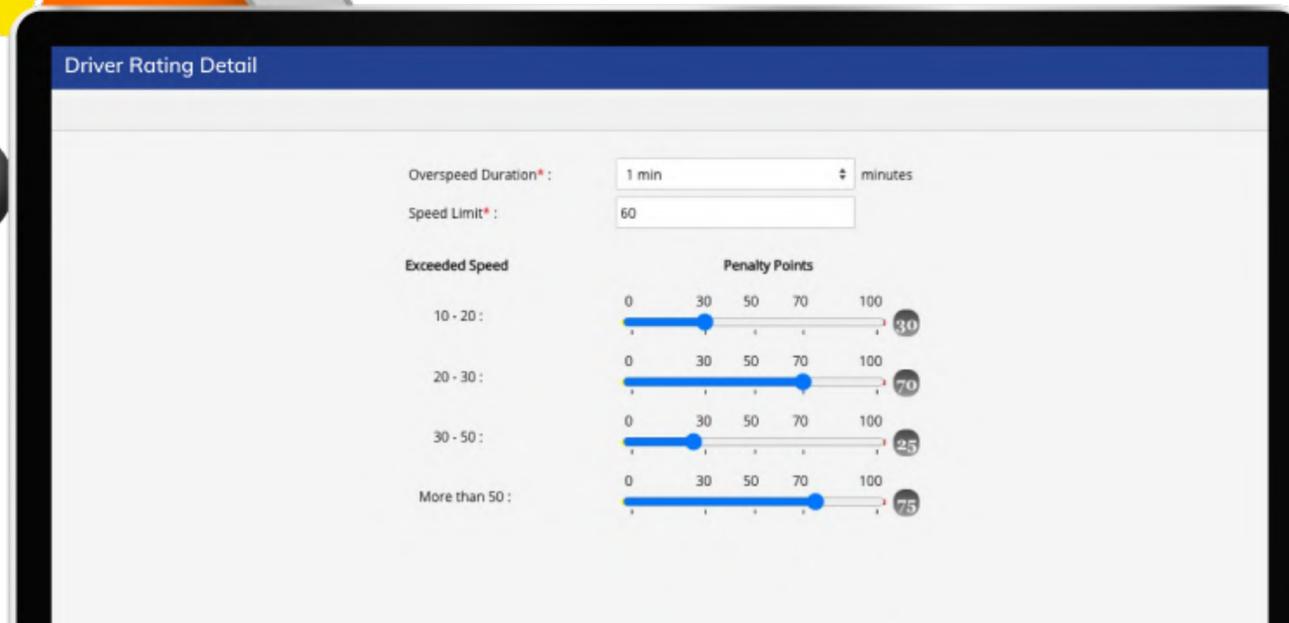

GPS triggered alerts for violations

Cut down maintenance and fuel costs through better driving

Get insights into driving performance via reports and driver ratings

Identify risky driving behaviors and teach your drivers to avoid it

Driver Rating
