Features

---

# Live Tracking

Live tracking is one of the major functionality of GPS software. It provide ultimate pet tracking solutions that can show real-time pet progress.

- Real-time tracking of many pets at the same time
- Cloud-based real-time database enables quick alert.

# Geofence and POI

Geofences can be setup in order to limit driver diversions, and points of interest can be highlighted within the map.

- Defines geographical boundaries with GPS
- Define perimeters
- Notifies when the pet crosses the geofence or POI area

# Report

Simple yet neat and easy to understand tracking reports that can help to make smart decisions whenever any doubt arise.

- Activity Report
- Single or multiple group of object selection
- Download report in different format
- Easy scheduling
- Customize Report as per requirement

# Alert

Alert notifies the users about certain situations and assist them to provide support on time. It provides essential information through GPS live tracking alerts useful to the supervisors in managing their fleet with less efforts.

- Multiple alerts of pets on single screen
- Alert can be received via SMS, Email or App notification
- Receive alerts like out of geofence and device tampering

A close-up photograph of two hands shaking in a firm grip. The hands are positioned in the center of the frame, with the fingers interlocked. The person on the left is wearing a dark grey suit jacket, and the person on the right is wearing a grey sweater. The background is blurred, showing what appears to be an office or meeting room with wooden chairs. The overall tone is professional and positive.
